Length.xls

This is used for traffic counts conducted with Non-Intrusive technology-(Ex: Miovision, RTMS, Wavetronix, etc). It provides breakup of the vehicle types per lane by Length. These templates are in a specific format and **must not be modified**. Each template is for all lanes. There are eight columns to be filled out.

Columns:

Count_Request	The job number associated with the particular count
Date	Date the count is conducted
Lane	The number of lanes at the count location
Direction	The direction of each lane counted
LengthBin1	Vehicles up to 20 feet long
LengthBin2	Vehicles > 20 feet up to 45 feet long
LengthBin3	Vehicles > 45 feet up to 215 feet long
Study Type	1 for Program Counts or 3 for Special Counts
