

Laurel Route 1 BGE Operation Pipeline Project

Dear BGE Customer,

BGE plans to upgrade the aging, underground natural gas mains in your neighborhood and throughout our service area to continue to deliver natural gas safely and reliably (see map of **Laurel Route 1 - Operation Pipeline Project** on reverse).

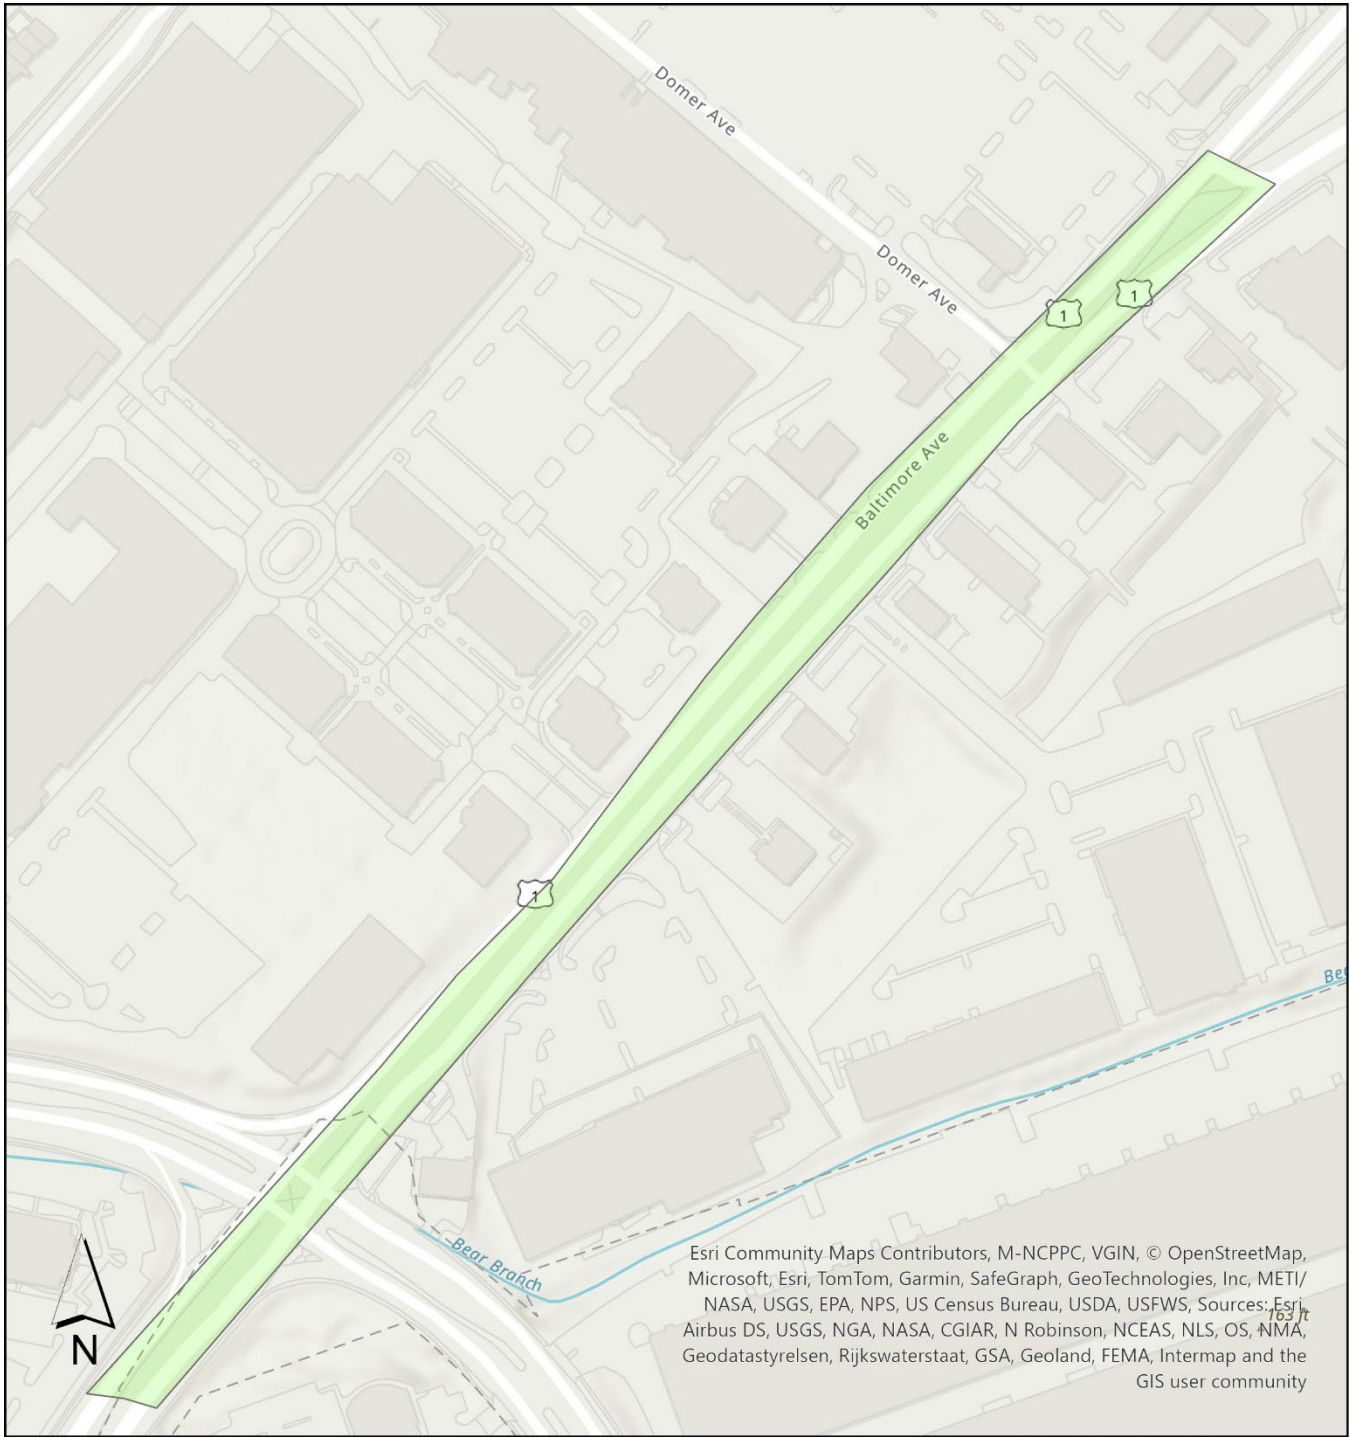

BGE authorized contractor **Riggs Distler** will be replacing the gas mains in the street and connecting customers' properties to the new gas system. This will require excavating the roads to access the gas mains, necessitating temporary lane closures and metal plates to cover the excavations in the off-hours. You may experience noise, dust, and debris. We will work to minimize the disturbance and we appreciate your patience.

Please contact BGE Operation Pipeline at **443-423-1120** or **operationpipeline@bge.com** with any questions or concerns. Include your address and reference for the **Laurel Route 1** in your message. You can learn more about the process and FAQs by visiting www.BGE.com/OperationPipeline. We thank you in advance for your patience and cooperation during this project.

Sincerely,

Ronald Kennedy
Sr. Project Manager, BGE

A reminder about gas emergencies: If you smell natural gas, leave the premises immediately and call BGE from a safe location. Your call for emergency gas service will be answered 24 hours a day, seven days a week. A service person will come to your home or business free of charge to check for an emergency. Remember, if you smell gas, leave the area first, THEN call **1-800-685-0123**.
