MARYLAND DEPARTMENT OF TRANSPORTATION STATE HIGHWAY ADMINISTRATION Office of Structures ***Guidelines and Procedures Memorandum***	PLANS Number: OOS-GPM-P-202 *(Former P-81-18(G))* Date: 08-05-2026
Hydrological and Hydraulic Data	Approval: Mauricio Agostino

OVERVIEW

Structures crossing or carrying bodies of water require additional engineering to properly size the structure based on hydrologic, hydraulic and scour computations. To properly document this information a plan sheet has been created for capturing pertinent data and shall follow the General Plan and Elevation.

For structures requiring this data, a note should be included on the General Plan and Elevation that states "FOR HYDROLOGICAL AND HYDRAULIC DATA, SEE SHEET XX"

One such sheet shall be utilized for each applicable structure in a contract.
