

Covering July 1, 2018 through June 30, 2019

# ANNUAL REPORT

---

FY 2019

**Delegation of Sediment and Stormwater  
Approval Authority**

**Prepared by:  
Maryland Department of Transportation  
State Highway Administration**

**Submitted to:  
Maryland Department of the Environment**

October 9, 2019

Jennifer M. Smith, P.E., Manager  
Sediment, Stormwater & Dam Safety Program  
Maryland Department of the Environment  
1800 Washington Boulevard, Suite 400  
Baltimore MD 21230

Dear Ms. Smith:

We are pleased to submit our annual report, covering fiscal year 2019. This report is in accordance with our July 8, 2014, Memorandum of Understanding and your February 24, 2015, Letter of Authorization. This program will continue to be funded by the Maryland Department of Transportation State Highway Administration (MDOT SHA).

We look forward to continuing our collaborative working relationship with the Maryland Department of the Environment (MDE) to successfully and effectively carry out the activities and responsibilities included in our delegated authority agreement. We are committed to working with MDE to ensure that our processes exceed MDE expectations. We welcome your input to modify or expand future reports to meet MDE requirements. If you have any questions or comments regarding this report, please contact Matthew Keenan, P.E., MDOT SHA Plan Review Division Chief, at 410-545-8821, or via email at [MKeenan@mdot.maryland.gov](mailto:MKeenan@mdot.maryland.gov).

Sincerely,

Eric Marabello, P.E.  
Director, MDOT SHA Office of Highway Development

cc: Matthew Keenan, P.E., Division Chief, Plan Review Division, MDOT SHA  
Sonal Ram, P.E., Director, Office of Environmental Design, MDOT SHA  
Angela Smith, P.E., Deputy Director, Office of Highway Development, MDOT SHA

## Section 1

1.1 MDOT SHA Response to MDE FY 2018 Review Comments .....4  
1.2 Introduction.....6  
1.3 Project Status .....6  
1.4 QA/QC Activities and Summaries of Site Inspection.....7  
1.5 Design Elements Not Meeting ESD to the MEP .....9  
1.6 Significant Staffing Changes .....10  
1.7 Local Agency Comments and Responses.....12  
1.8 Investigations of Citizen Complaints and Inquiries.....12  
1.9 Plan Review Program Activity Findings.....14  
1.10 Modifications to the Guidelines and Procedures .....16  
1.11 Electronic Data .....16

## SECTION 2

2.1 Project Status Reports .....17  
2.2 Water Quality Bank Debits .....85  
2.3 Agency Meeting Summary .....88

## 1.1 MDOT SHA RESPONSE TO MDE FY 2018 REVIEW COMMENTS

<b>Reporting Requirement</b>	<b>MDOT SHA Response</b>
<b>Reporting</b>	This MDOT SHA response covers MDE comment letters dated September 16, 2019, (Annual Report). The reporting dates, deadlines, and format for future annual reports are noted. This current report covers fiscal year (FY) 2019 (July 1, 2018 through June 30, 2019). This report is included as Appendix A of the MDOT SHA MS4 Annual Report. As requested, E&SC and SWM statistics have been included in the MS4 geodatabase.
<b>Project Status Reports</b>	As requested, example plans are not included with this report. Approved SWM plans will be available on-site during future field audits and will be provided at MDE's request.
<b>QA/QC Activities and Summary of Site Inspections</b>	<p>MDOT SHA ensures quality assurance and quality control (QA/QC) of approved erosion and sediment control plans through inspections of MDOT SHA construction projects for compliance with the approved Erosion and Sediment Control Plans. During the FY19 reporting period:</p> <ul style="list-style-type: none"> <li>• The QA Program grew to 19 total representatives and the program formalized a Progressive Schedule Protocol in effort to ensure maximum resource coverage with a priority review to critical/sensitive environmental projects. Statewide implementation of the Progressive Schedule Protocol went into effect on June 29, 2019 at the very end of FY 2019. Successes and possible improvements of the Progressive Schedule Protocol will be included in the FY 2020 Annual Report. As requested, additional information on the Progressive Schedule Protocol can be found in Section 1.6.</li> <li>• MDOT SHA performed 5779 inspections (3851 QA-1 and 1928 QA-2 reports) on 445 projects. A record number of 38 non-compliances were issued to 33 unique and different projects. A leading cause of non-compliance shutdowns is due to repeated deficiencies.</li> <li>• The QA Program also received and addressed 4 related Erosion and Sediment Control or Storm Water Management environmental complaints/inquiries from MDE, counties, and/or citizens.</li> <li>• The Quality Assurance Program (QAP) was reorganized into the Quality Assurance Division (QAD) in FY 2019. Additional information on this reorganization can be found in Section 1.6.</li> </ul>
<b>ESD to the MEP Design Elements</b>	<p>PRD will no longer require 3.3.A. waivers for total maximum daily load (TMDL) and MS4 compliance projects. The provided waiver data in Section 1.5 reflects this.</p> <p>MDOT SHA will continue to explore the development of general approvals to support certain activities that have limited earth disturbance and no stormwater management requirements. Examples of these general approval eligible activities may include guard rail installation, ditch trimming and grading, and routine BMP maintenance. MDE concurrence is required for all MDE SHA general approvals. As such, MDOT SHA will coordinate with MDE as these general approvals are further explored. As of the date the completion of FY 2019, there was no significant progress made on this effort to report.</p>
<b>Changes to the Approved Standard Operating Procedures (SOPs)</b>	No changes were made to the PRD SOPs during the reporting period, including the Sediment and Stormwater Guidelines and Procedures, and the Sediment and Stormwater Current Technical Practices. PRD will notify MDE in the FY 2020 Annual Report if these documents are updated in the FY 2020 reporting period.

<b>Changes to Staff</b>	Significant staffing changes during FY 2019 are reported in Section 1.6.
<b>Local Agency Comments</b>	Most PRD coordination with local agencies occurs informally through email or phone conversations. However, during the reporting period, several agency meetings were held on projects currently under review at PRD. Summaries of these agency meetings are located in Section 2.3. Copies of the meeting materials located in the enclosed data drive.
<b>Public Outreach Meetings</b>	Per previous MDE request, reporting of public outreach meetings is no longer provided. The information will still be available upon MDE request.
<b>Citizen Complaints and Inquiries</b>	MDOT SHA will continue to provide specific and focused information of citizen complaints and inquiries in relation to the projects being reviewed by PRD with respect to Sediment and Stormwater topics in the annual reports. The current annual report contains summaries of eight projects in Section 1.8. As requested, the cause of the emergency repair under 17-PR-0120 is also discussed in Section 1.8.
<b>Plan Review Program Activity Findings</b>	Plan review program activity findings will continue to be reported in Section 1.9.

## 1.2 Introduction

The Maryland Department of Transportation State Highway Administration (MDOT SHA) and the Maryland Department of the Environment (MDE) signed a Memorandum of Understanding (MOU), dated July 8, 2014, designating MDOT SHA as an approving authority for erosion and sediment control and stormwater management plans for MDOT SHA projects in accordance with the applicable sections of the Code of Maryland (COMAR). This authority was given by a letter of authorization from MDE on February 24, 2015. This report serves to satisfy the MOU condition to report on relevant activities on an annual basis after the first year of delegated authority. This report covers fiscal year 2019 (FY 2019) and includes the time period from July 1, 2018 through June 30, 2019. This annual report includes:

- Project status reports detailing the progress of design, review, approval, and construction activity achieved to date
- Findings related to plan review program activities
- Explanations and justifications for any design elements not meeting Environmental Site Design (ESD) to the Maximum Extent Practicable (MEP) according to the Design Manual or the 2011 Standards
- Changes or modifications to the Guidelines and Administrative Procedures
- Significant staffing changes
- Summaries of site inspections conducted
- Comments received and written responses provided to local agencies
- Findings related to quality assurance and quality control activities
- Investigations of citizen complaints and inquiries

## 1.3 PROJECT STATUS

The Plan Review Division maintains a database to track submittals and approval progress on all projects. The table provided below provides a summary of the PRD review and approval activity that occurred in FY 2019. Overall, the review and approval activity remained consistent from FY 2018 to FY 2019.

Project status reports included in Section 2.1 show the progress of design, review, approval, and construction activity achieved during the reporting period. The reports are separated by project type (DBB, DB, MDE). Summaries of Plan Review Division review and approval activity and SWM BMP as-built approvals are included below:

### FY 2019 Review and Approval Activity

	Design-Bid-Build Projects (DBB)	Design-Build Projects (DB)	MDE Approved Projects (MDE)	Total
FY 2019 Active Projects	419 (90%)	8 (2%)	36 (8%)	463
Submissions Received	1146 (83%)	136 (10%)	105 (8%)	1387
Comment Letters Issued	618 (85%)	86 (12%)	27 (4%)	731
Concept Approvals	111 (94%)	7 (6%)	0 (0%)	118
Site Development Approvals	103 (91%)	26 (19%)	0 (0%)	113
Final Approvals	154 (96%)	6 (4%)	1 (1%)	161
Modification Approvals	92 (66%)	26 (19%)	21 (15%)	139
Final Approval Extensions	41 (73%)	1 (2%)	14 (25%)	56
As-built Structural Acceptance	27 (39%)	0 (0%)	42 (61%)	69

### Representative Projects

As requested by MDE, no representative project submissions or correspondence have been provided with the FY 2019 report. Information and documents pertaining to specific projects can be provided for review if requested by MDE.

## 1.4 QA/QC Activities and Summaries of Site Inspections

The MDOT SHA ensures quality assurance and quality control (QA/QC) of approved erosion and sediment control plans through inspections of MDOT SHA construction projects for compliance with the approved Erosion and Sediment Control Plans, utilizing a checklist and rating system. The MDOT SHA's quality assurance inspections are performed by Regional Environmental Coordinators (REC). The MDOT SHA utilizes a real-time inspection and reporting system called the QA Toolkit. The QA Program grew to 19 total representatives in FY 2019 and formalized a Progressive Schedule Protocol in effort to ensure maximum resource coverage with a priority review to critical/sensitive environmental projects.

Progressive Schedule Protocol is an inspection schedule which allows for more efficient use of resources and management of environmental risk while maintaining compliance. This is accomplished by prioritizing certain projects for increased inspections and reducing routine visits to projects with good performance.

#### Key Changes:

- *Inspect projects routinely a minimum of every 4 weeks to ensure compliance to the approved ESC/SWM plans through the OOC61/QA-1 and contract documents.*
- *Increase the inspection frequency to a minimum of 4 times per quarter (approximately every 3 weeks) on projects with incentives.*

- *Increase the inspection frequency to a minimum of every 2 weeks for projects which receive a C, D or F rating.*
- *Reduce the frequency of future QA inspections when a project demonstrates A ratings for 3 consecutive QA inspections. This does not apply to projects with incentives.*

This schedule will automatically prioritize major construction projects and reduce routine visits on those performing at or above expectations, while returning to a 2 week schedule to those projects whose ratings drop below a “B” rating. To help reach the overall goal of 100% compliance by MDOT SHA, QAD will use the new inspection schedule to focus resources on projects with more risk to potentially impact Maryland’s water resources. Projects rated at the top of the inspection rating scale will not be inspected as often. However, ensuring that contractors retained the right to continue to earn incentives was critical to establishing the new inspection timeline. Therefore, the new QA inspection schedule will not impact projects with any specifications identifying a 2 week inspection requirement.

Progressive Schedule Protocol went into effect on June 29, 2019 at the very end of FY19. An update on the Progressive Protocol Schedule, including successes and possible improvements, will be included in the FY 20 Annual Report.

During this FY 2019 period, MDOT SHA performed 5779 inspections (3851 QA-1 and 1928 QA-2 reports) on 445 projects. A record number of 38 non-compliances were issued to 33 unique projects. Ratings of “D” and “F” were issued 36 times during this reporting period. All of these non-compliance events were subsequently corrected. Grading operations were shut down on 16 projects until corrective actions were completed. Complete shutdowns until corrective actions were completed occurred on 20 projects. Shutdowns cause significant financial impacts to the contractor as all deployed material, equipment, and construction laborers become inactive until the deficiencies are addressed. This is one of the largest sanctions available to QAD and promotes contractor attention that greatly reduces chances of repeat non-compliance. Additionally, liquidated damages can be deployed to recover MDOT SHA’s financial impact. Liquidated damages resulted from 29 different incidents totaling \$223,720 per the contract documents. The status of these liquidated damages are as follows: 6 violations have resulted in liquidated damages withdrawn in the amount of \$33,511, 13 violations are pending totaling \$136,486, and 10 possible violations have been identified totaling \$53,723, but the liquidated damages claims have not yet been started.

Revocation of a contractor’s Erosion Sediment Control Manager (ESCM, or Yellow Card) and Contractor Superintendent certifications is a separate sanction that can impact the contractor, because these certifications are required for those personnel to be employed on an MDOT SHA

project. Revocation is activated for a period of six months upon two ratings of “F”. Certification revocations are listed in each project inspection report. There were 16 Yellow Card revocations during this reporting period. Details of the non-compliance findings and the actions taken can be found in the provided summary of Quality Assurance Inspections by MDOT SHA district.

During the FY 2019 reporting period, the total number of project inspections stopped or placed on hold was 127. A list of the projects placed on hold and the reasons for the hold status is included with the electronic data. The QA Program also received and addressed 4 related erosion and sediment control or stormwater management environmental complaints and inquires in FY 2019 from MDE, local jurisdictions, or citizens.

## 1.5 DESIGN ELEMENTS NOT MEETING ESD TO THE MEP

The Maryland Legislature enacted the Stormwater Management Act of 2007 which established stringent requirements to implement Environmental Site Design (ESD) to the Maximum Extent Practicable (MEP). MDOT SHA’s Plan Review Division reviews each project submission in relation to the requirements, Guidelines, and Procedures. Stormwater Management reports are required for each project. The majority of projects include plans. At concept stage, SWM requirements are reviewed for management required and conceptual management provided as well as the appropriateness of any waivers and variances requested. Site development and final stage submissions are reviewed for engineering design, consistency, and completeness. Waivers and variances are granted only at final approval once all applicable documentation and local agency approvals are provided.

MDOT SHA-PRD has utilized the language in COMAR Section 26.17.02.06.A(2) as a basis to determine whether a project meets ESD to the MEP:

“The MEP standard is met when channel stability and 100 percent of the average annual predevelopment groundwater recharge are maintained, nonpoint source pollution is minimized, and structural stormwater management practices are used only if determined to be absolutely necessary.”

This statement is further explained in the MDOT SHA Guidelines Section 4.1 and 4.2 as minimum control requirements for new development and redevelopment.

The majority of waivers and variances granted by PRD are for maintenance or redevelopment projects (funds 30, 33, 74, 76, 77, 80, 88). Many of these projects are located in developed corridors with limited opportunities for ESD facilities. They often include small amounts of additional impervious scattered throughout the project (funds 76, 77, 80) or narrow strips of additional impervious along the corridor (funds 33). These project types use the Water Quality Bank to meet WQv requirements when ESD facilities are not practicable.

PRD granted variances for 29 projects within FY 2019. The majority of variances were for redevelopment projects such as Safety and Spot Improvements (6 projects) and Crash Prevention (6 projects). The table below shows waivers and variances accepted in FY 2019 by fund type.

**FY 2019 Granted Waivers and Variances by MDOT SHA Fund Type**

Fund	Description	No. of Waivers	No. of Projects with Waivers	No. of Variances	No. of Projects with Variances
29	Facilities & Equipment	2	1	0	0
30	Crash Prevention	11	4	10	6
33	ADA Retrofit	120	6	17	4
70	Primary Roadways	0	0	0	0
71	Secondary Roadways	17	4	8	4
74	Drainage	40	16	0	0
76	Safety & Spot Improvements	30	3	14	6
77	Resurfacing & Rehabilitation	157	20	3	2
80	Bridge Replacement & Rehabilitation	72	14	4	3
81	Park and Ride	1	1	0	0
84	Community Safety & Enhancements	9	2	7	1
85	Traffic Management	1	1	0	0
87	CHART	2	2	3	2
88	Bicycle Retrofit	5	1	6	1
Totals		467	75	72	29

The MDOT SHA Office of Highway Development (OHD) process is designed to ensure ESD to the MEP begins with a project concept design presentation to the OHD Director (Director’s Review). Any concerns or issues noted during the Director’s Review are addressed before the initial concept submission is made to PRD. This process provides leadership-level commitment to project needs and a focus on ESD to the MEP at a very early stage in the design process.

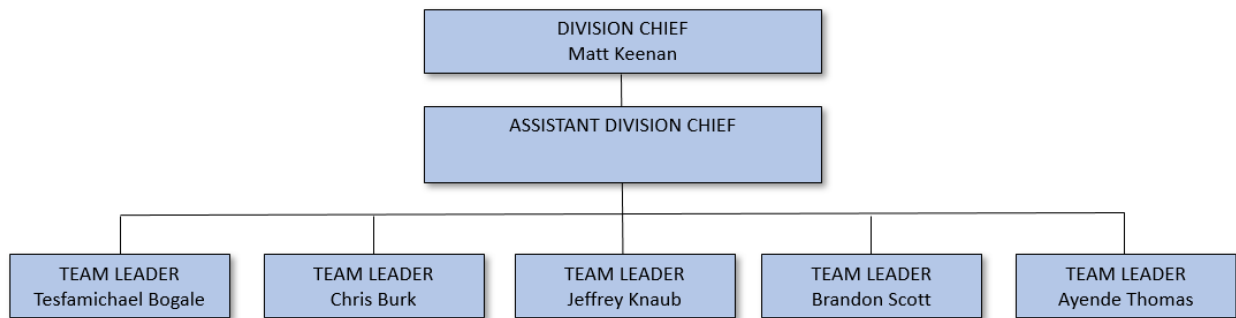

## 1.6 SIGNIFICANT STAFFING CHANGES

The Plan Review Division had several significant staffing changes during this reporting period. Effective November 7, 2018, Matthew Keenan, PE became the Division Chief of the Plan Review Division.

Ayende Thomas, PE was hired on January 2, 2019 to fill the Team Leader position vacated by Matthew Keenan. Additionally, Christopher Burk, PE, Prof. LS was hired on April 10, 2019 to fill the fifth PRD Team Leader position. PRD currently has all 5 Team Leader positions filled.

The PRD Assistant Division Chief, Jason Ferner, PE, left employment with MDOT SHA on January 10, 2019. As of the conclusion of this reporting period, the PRD Assistant Division Chief position remains unfilled.

The updated organizational chart for the Plan Review Division is included below.

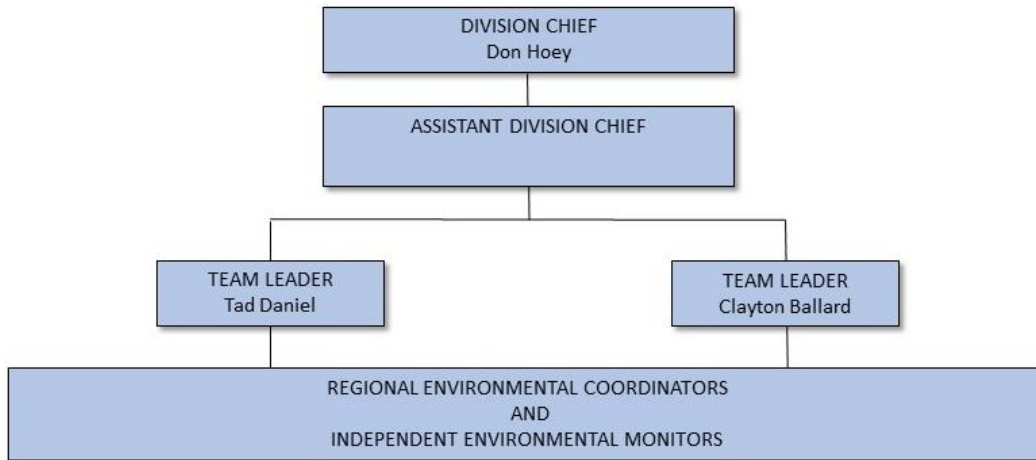

During the FY 2019 reporting period, the Quality Assurance Program (QAP) was reorganized into the Quality Assurance Division (QAD) under the Office of Environmental Design (OED). The Quality Assurance Division had several significant staffing changes during this reorganization. Effective February 27, 2019, Donald Hoey became the Division Chief of the Quality Assurance Division. The creation of the QAD allows Quality Assurance to be further detached from design divisions within OED to better function as an independent SWM and ESC compliance agency to meet the expectations of Delegated Authority.

The current organization chart defines a Division Chief (DC), Assistant Division Chief (ADC), and Two Team Leaders (TL). The QAD Assistant Division Chief position is currently unfilled. Tad Daniel (MDOT SHA) and Clayton Ballard (consultant) remain as Team Leaders. Open positions are expected to be filled in the early part of FY 2020. The QAD is supported by 16 Regional Environmental Coordinators (REC) below the two TLs

In addition to the RECs, QAD now oversees the Independent Environmental Monitors (IEM) where required on construction projects (currently 5). The new IEM oversight by QAD is an effort to enhance the ESC and SWM compliance checks of projects.

The updated organizational chart for the Quality Assurance Division is included below.

## 1.7 LOCAL AGENCY COMMENTS AND RESPONSES

No local agencies reached out to PRD during the reporting period. There are no current examples of formal correspondence related to local agency comments because most coordination with local agencies occurs informally through email or phone conversations. In relation to specific projects being reviewed by PRD and its coordination with local agencies, MDOT SHA remains committed to being responsive to requests received. During this reporting period, agency meetings were held for the following projects:

- 17-PR-0088, SM2105171, MD 5 Great Mills Road
- 17-PR-0150, HA3345271, MD 24 (Section G) in Rock State Park
- 17-PR-0154, MO0695172, I-270 Innovative Congestion Management
- 19-PR-0023, AX7665D82, TMDL Design Build

A meeting summary is included in Section 2.3.

## 1.8 INVESTIGATIONS OF CITIZEN COMPLAINTS AND INQUIRIES

MDOT SHA strives to provide outstanding customer service. The Highway Hydraulics Division utilizes a tracking tool to assist in providing this. Additionally, MDOT SHA uses an on-line customer care reporting and communication system. Both systems receive a wide variety of concerns associated with highway operations. MDOT SHA will continue to provide specific and focused information of citizen complaints and inquiries related to sediment and stormwater topics for projects being reviewed by PRD.

Background information and updates are included below for the projects previously reported on, along with one new project received by PRD during FY 2019:

- 10-SF-0402, FR5715170, US 15 at Monocacy Boulevard Interchange, is a major highway project constructing a new interchange at US 15 and Monocacy Boulevard. The MDOT SHA received a complaint from the Walkersville Southern Railroad regarding flooding concerns and impacts to the railroad property due to the May 2018 excessive rainfall events. There are no updates to report during this period.
- 15-PR-0074, BA1445174, I-795 Maintenance Repairs to Painters Mill Levee, was initiated to comply with FEMA requirements for levee certification and involves raising the levee from its original elevation to meet the current regulatory requirements. Final FEMA certification was obtained on May 7, 2018. This is the final update for this project and it will not be included in future annual reports.
- 15-PR-0097, AW8695170, MD 404 from US 50 to Holly Road, is a major highway project that involves 9 miles of dualization of MD 404. As reported in the FY 2017 and FY 2018 Annual Reports, a specific complaint was received from a property owner downstream of Twin Ponds Lane (formerly known as Access Road 2). During the FY 2019 reporting period PRD reviewed and approved plans to convert the previously approved and constructed grass swale facilities into bioswales to satisfy the ESDv requirements for this POI and reduce peak discharges and runoff volumes from the 2- and 10-year frequency storm events. These bioswales were also constructed during FY 2019. MDOT SHA has been monitoring these bioswales since construction was completed and as-built plans are being developed to submit for review to PRD. The downstream property owner has not been satisfied with the performance of the installed bioswale facilities. MDOT SHA is currently exploring multiple options to determine a solution to address the property owner's complaints. Additional updates will be provided in the FY 2020 Annual Report.
- 15-PR-0100, BA7125174, I-695 at Cromwell Bridge Road Minebank Run Restoration and Water Quality Improvements, was initiated to address public safety concerns. A degrading outfall and a major head cut formed directly adjacent to a townhome community which was reported to MDOT SHA. Construction began in summer of 2018. The main portion of the stream work will begin in Fall of 2019 with an anticipated Fall 2020 project completion date.
- 16-PR-0039, WA2805174, MD 804 Flood Abatement at Chewsville, was initiated after drainage concerns were raised by residents on January 1, 1999. Citizen concerns required

a design change from the original concept. This revised design received Site Development approval on April 16, 2019 and made one Final submittal.

- 16-PR-0075, Site 1, MD 312 Culvert Replacement/Enhancement project was initiated after a drainage issue was reported in March 2013 by the downstream property owner. Two site development submittals were made to PRD for this project during the FY 2019 reporting period.
- 17-PR-0120, I-95 South near Patapsco River, Outfall Repair. As reported in the FY 2018 Annual Report, MDOT SHA was contacted by the property owner at 6159 River Road in Howard County about extensive erosion and debris resulting from I-95 drainage that accumulated and closed his driveway. The situation was declared an emergency and the project was completed using a statewide open-end contract. Concept Approval was granted on August 17, 2017 and Final Approval was granted on January 22, 2018. In the FY 2018 comments, MDE requested information regarding the cause of this erosion event. Site inspection reports and documentation from MDOT SHA maintenance and Highway Hydraulics Division attribute the erosion to a failed and separated drainage connection between a manhole and 27" CMP pipe. Storm flows from the separation caused erosion of the backfill material over the drainage system installed along a 2:1 slope. The backfill material deposited downstream along a private access drive, where the road slope dissipated the flow velocity, causing a safety issue. The CMP pipes were found to be in good condition, so in-kind replacement of the drainage system was performed.
- 17-PR-0128, Site 3, 109 South Winchester Road. A property owner reached out to MDOT SHA on August 18, 2017 stating that the channel in their backyard, conveying MDOT SHA runoff, was depositing silt in the portion of the Severn River near her dock. The property owner requested that the riprap pad at the outfall be extended to the bay based on the original design and drainage complaint from 2005. MDOT SHA placed a riprap outfall protection in 2010 for the initial complaint. MDOT SHA evaluated the area and designed, permitted, and constructed the channel improvements in April and May of 2019. Sedimentation in the area has significantly decreased as a result of the improvements.

## 1.9 PLAN REVIEW PROGRAM ACTIVITY FINDINGS

The number of submissions to PRD increased slightly from FY 2018 to FY 2019. PRD has not added additional consultant reviewers to the current pool of MDE/PRD approved reviewers in FY 2019.

MDOT SHA initiated several programmatic initiatives during the past fiscal year that affect PRD, including:

- New 2019 Standard Specifications for Construction and Materials, available as an online document.
- An automated tool has been developed by MDOT SHA OHD that solicits the status of the Stormwater Management and Erosion and Sediment Control review for a project from PRD and relays this to the project advertisement team in the Engineering Resource Division (ERD) and Design Technical Services Division (DTSD). The goal of this tool is to ensure that the appropriate SWM and ESC review milestones are being achieved during the advertisement process to prevent unexpected advertisement delays.

In addition to the above Administration-wide efforts, PRD also undertook specific initiatives, including:

- Through coordination with the Maryland Department of Natural Resources (DNR), PRD understands that stormwater BMPs with permanent wet pools cannot be allowed in USE III and USE IV watersheds. PRD has been incorporating this policy into project review comments on several projects. If existing wet pool facilities in Use III and USE IV watersheds are impacted by a project under review, those wet pool facilities must be replaced and all lost SMW mitigated for in a BMP type appropriate for minimizing thermal impacts.
- PRD has been coordinating extensively with the MDE Sediment, Stormwater, and Dam Safety Program (SSDS) in order to allow PRD to become a delegated Code 378 Small Pond review and approval authority. A draft Memorandum of Understanding (MOU) was submitted to MDE SSDS on April 24, 2019. As of the conclusion of the FY 2019 reporting period, PRD has not received comments or approval on this MOU. PRD has supported MDE SSDS in developing several Code 378 Small Pond policy and design documents, and will continue to do so in FY 2020.
- On July 1<sup>st</sup>, 2019, PRD began using an updated version of the Water Quality Banking Summary Sheet (WQBSS). The updated WQBSS was developed in conjunction with MDE SSDS and, among other minor updates, changed when the Water Quality Bank fee was applied from when debits were made to when credits were deposited into the Water Quality Bank. PRD provided two training sessions on the use of the updated WQBSS to the design consultant community on June 24, 2019. An internal MDOT SHA training was held on June 12, 2019. As part of the migration to the new WQBSS, PRD has also encouraged designers to utilize the previously released MDE SWM Calculator and Environmental Site Design Summary Sheets when developing SWM plans for MDOT SHA. Training on the use of these spreadsheets was included during the June 12 and 24 training sessions.
- PRD attended the stormwater training program “Fundamentals of Success: Past, Present, and Future” hosted by MDE at the Maritime Institute on June 4, 2019.
- PRD attended the dam safety workshop hosted by the MDE Dam Safety Division on November 14, 2018 at MDE headquarters in Baltimore.

## 1.10 MODIFICATIONS TO THE GUIDELINES AND PROCEDURES

No changes or updates have been made to the Guidelines and Procedures or Current Technical Practices in the FY 2019 reporting period. If these documents are updated in FY 2020, they will be provided for review in the FY 2020 Annual Report.

## 1.11 ELECTRONIC DATA

As referenced in the previous sections, electronic data is located on the data drive submitted with this report. The following electronic data is included:

- PRD data table that includes project data, approvals, waivers, and variances
- Agency Meeting Materials
- Erosion and sediment control inspections, non-compliant inspections, and enforcement actions:
  - QA Non-compliance Findings (1B.1 QANonComplFind.pdf)
  - Projects on hold (1B.2 QAInspectionHold.pdf)
  - Quality Assurance Inspections by District (1B.3 QA\_InspectionPerDistrict.pdf)
  - E&S Statistics are included in the MS-4 geodatabase

## 2.1 PROJECT STATUS REPORTS

Three Project Status Reports are included starting on the following page:

1. MDOT SHA Design-Bid-Build Projects
2. MDOT SHA Design-Build Projects (post award)
3. MDE SF Projects

# MDOT SHA Design Bid Build Projects - Reporting Period July 1, 2018 through June 30, 2019

PRD#	Phase	PRD TL	HHD Liaison	SHA PM	Lead Office	Stage	Sub	Received	Comment/ Approval	Concept Approved	Site Dev Approved	Final Approved	Mod Approved
15-PR-0001	1	Tesfamichael Bogale	Patrick Nadeau	Patrick Nadeau	OHD	CE4035174	MD 272	MD 272, North of Rogues Harbor Rd

## 2.3 AGENCY MEETING SUMMARY

## Agency Meeting Summary

July 1, 2018 through June 30, 2019

### July 18, 2018 Inter-agency Review Meeting

#### **I-270 Innovative Congestion Management Program, Montgomery County, Project No. MO0695172 (PRD No. 17-PR-0154)**

The project team provided a NEPA and permitting status update on the project. The discussion included the NEPA/MEPA status for all fourteen breakout projects of the program. It was noted that adaptive ramp metering and active traffic management are also being considered as additional projects, which will each require separate environmental documents.

#### **TMDL Design Build, Various Counties, Project No. AX7665D82 (PRD No. 19-PR-0023)**

The project team presented the approach and goals for the TMDL Design Build Project. The Administration plans to select a Design Build team, whom will initiate design activities and site selection under a PCE. Once sites have been screened for potential NEPA issues, determination will be made to proceed to final engineering or remove sites with fatal flaws. Sites requiring NEPA clearance must be cleared by MDOT SHA prior to construction commencing. The ultimate goal is for the Administration to gain 500 TMDL credits under the contract.

### March 20, 2019 Inter-agency Review Meeting

#### **MD 24 Section G, Harford County, Project No. HA3345271 (PRD No. 17-PR-0150)**

The project team provided an overview of the project (limits, location, purpose & need). The scope includes stabilization of the roadway embankment, realignment of Deer Creek, reconstruction of MD 24 and removal of a privately-owned bridge. Discussion covered the proposed slopes from the road to Deer Creek (proposed 2:1), property owner coordination, SWM issues, Deer Creek impacts/diversions, and tree removal. Regarding SWM, it was clarified that the MD 24 reconstruction is to be classified as 'maintenance' for SWM purposes, as the intent is to restore MD 24 to its original line & grade.

#### **MD 5 Great Mills, Saint Mary's County, Project No. SM2105171 (PRD No. 17-PR-0088)**

The project team presented the purpose and need, recommended alternative (4 lanes undivided with bridge replacement, including partial closure of Old Great Mills Road), and environmental impacts (including archaeological survey, floodplains, and 4(f) concerns). The project is moving into design, which is fully funded. The environmental document (CE) is anticipated to be approved by FHWA in 2019.
