

Covering July 1, 2021, through June 30, 2022

ANNUAL REPORT

FY 2022

**Delegation of Sediment and Stormwater
Approval Authority**

**Prepared by:
Maryland Department of Transportation
State Highway Administration**

**Submitted to:
Maryland Department of the Environment**

October 6, 2022

Jennifer M. Smith, P.E.
Manager
Sediment, Stormwater & Dam Safety Program
Maryland Department of the Environment
1800 Washington Boulevard, Suite 400
Baltimore MD 21230

Dear Ms. Smith:

We are pleased to submit our annual report, covering fiscal year 2022. This report is in accordance with our July 8, 2014, Memorandum of Understanding and your February 24, 2015, Letter of Authorization. This program will continue to be funded by the Maryland Department of Transportation State Highway Administration (MDOT SHA).

We look forward to continuing our collaborative working relationship with the Maryland Department of the Environment (MDE) to successfully and effectively carry out the activities and responsibilities included in our delegated authority agreement. We are committed to working with MDE to ensure that our processes exceed MDE expectations. We welcome your input to modify or expand future reports to meet MDE requirements. If you have any questions or comments regarding this report, please contact Zhihua Kuang, P.E., MDOT SHA Plan Review Division Acting Chief, at 410-545-8897, or via email at ZKuang@mdot.maryland.gov.

Sincerely,

Eric Marabello, P.E.
Director, MDOT SHA Office of Highway Development

cc: Zhihua Kuang, P.E., Acting Chief, Plan Review Division, MDOT SHA
Laura Ridler, P.E., Deputy Director, Office of Highway Development, MDOT SHA
Sonal Ram, P.E., Director, Office of Environmental Design, MDOT SHA

1.1 MDOT SHA Response to MDE FY 2021 Review Comments	4
1.2 Introduction	6
1.3 Project Status	6
1.4 QA/QC Activities and Summaries of Site Inspection.....	7
1.5 Design Elements Not Meeting ESD to the MEP	9
1.6 Significant Staffing Changes	11
1.7 Local Agency Comments and Responses	13
1.8 Investigations of Citizen Complaints and Inquiries	13
1.9 Plan Review Program Activity Findings	17
1.10 Modifications to the Guidelines and Procedures	21
1.11 Electronic Data	22

SECTION 2

2.1 Project Status Reports	23
2.2 Water Quality Bank Debits.....	51
2.3 Agency Meeting Summary	53

1.1 MDOT SHA RESPONSE TO MDE FY 2021 REVIEW COMMENTS

Reporting Requirement	MDOT SHA Response
Reporting	<p>MDOT SHA PRD received the review comments on the FY 2021 Annual Report regarding the delegation of erosion and sediment control and stormwater management approval authority on September 26, 2022.</p> <p>The current report covers fiscal year (FY) 2022 (July 1, 2021, through June 30, 2022). Erosion and sediment control (E&SC) and stormwater management (SWM) statistics have been included in the MS4 geodatabase.</p>
Project Status Reports	<p>In FY 2022, MDOT SHA PRD received 636 submissions. From these submissions, PRD issued 287 comment memoranda, 60 concept approvals, 45 site development approvals, and 58 final approvals. Additionally, 84 modifications were approved, as-builts approvals for 36 projects (143 BMPs) were issued, and 64 final approval extensions were issued. For further information, refer to section 1.3.</p> <p>As reported in FY 2021 Annual Report, PRD has adopted electronic plan review and eliminated paper files. Approved SWM plans can be provided electronically to MDE at MDE's request.</p>
QA/QC Activities and Summary of Site Inspections	<p>MDOT SHA continues to ensure QA/QC of approved erosion and sediment control plans through inspections of MDOT SHA construction projects for compliance with the approved E&SC Plans. Information on the QA/QC activities of the Quality Assurance Division (QAD) for the reporting period can be found in Section 1.4.</p>
ESD to the MEP Design Elements	<p>PRD continues to report tables displaying the types and quantities of waivers issued. Information for the current reporting period is provided in Section 1.5. Of the 90 SWM waivers granted by PRD in FY 2022, 83 were 3.3.A waivers. Of the 7 "3.3.B" waivers issued by PRD in FY 2022, 3 were 3.3.B.3 waivers that waived management of the 10- year or 2-year frequency storm events when downstream flooding is not present, and concurrence is received from the local jurisdiction.</p> <p>The General Approval that will cover routine maintenance activities, mentioned in the FY 2021 Annual Report, is still under development and has not yet been submitted to MDE for concurrence. For further information, refer to section 1.9.</p>
Changes to the Approved Standard Operating Procedures (SOPs)	<p>During the reporting periods, PRD had proposed changes to the Sediment and Stormwater Guidelines and Procedures. During the current reporting period, PRD has been working with MDE to develop a standalone Small Pond Guidelines and Procedures. The draft Small Pond Guidelines and Procedures have been reviewed and commented by MDE. MDOT SHA PRD and MDE are still working together to finalize the Small Pond Guidelines and Procedures. MDOT SHA received review comments on the Minor and Major Field Modification Guidelines and Procedures (Guidelines) as part of FY 2021 review. The comments will be addressed, and the revised document will be provided to MDE separately.</p> <p>PRD will continue to report updates to MDE in the FY 2023 Annual Report. This is discussed in Section 1.10.</p>

Changes to Staff	MDOT SHA continues to provide updates regarding staff changes. Significant staffing changes during FY 2022 are reported in Section 1.6.
Local Agency Comments	<p>As reported in the FY 2021 report, following a meeting on May 17, 2021, regarding the 100-year stormwater management requirements, Prince George's County was to provide a memo that requests the stormwater management concept plans for all projects be submitted to Prince George's County Department of Permitting, Inspections and Enforcement (DPIE) for review and comment. As of the conclusion of the FY 2022 reporting period, this memo has not been received.</p> <p>Most PRD coordination with local agencies occurs informally through email or phone conversations. During the reporting period, several agency meetings were held on projects currently under review at PRD. Summaries of these agency meetings are reported in Section 2.3. If, in the future, there will be formal correspondences related to local agency comments, MDOT SHA will provide those correspondences to MDE.</p>
Public Outreach Meetings	Per previous MDE request, reporting of public outreach meetings is no longer provided. The information will still be available upon MDE request.
Citizen Complaints and Inquiries	MDOT SHA continues to provide specific and focused information of citizen complaints and inquiries in relation to the projects being reviewed by PRD with respect to sediment and stormwater topics in the annual reports. The current Annual Report contains summaries of 13 new projects and updates on projects reported in the FY 2021 report related to citizen complaints. This is discussed in Section 1.8.
Plan Review Program Activity Findings	Plan review program activity findings are reported in Section 1.9.

1.2 Introduction

The Maryland Department of Transportation State Highway Administration (MDOT SHA) and the Maryland Department of the Environment (MDE) signed a Memorandum of Understanding (MOU), dated July 8, 2014, delegating MDOT SHA as an approving authority for erosion and sediment control and stormwater management plans for MDOT SHA projects in accordance with the applicable sections of the Code of Maryland (COMAR). This authority was given by a letter of authorization from MDE on February 24, 2015. This report serves to satisfy the MOU condition to report on relevant activities on an annual basis after the first year of delegated authority. This delegation has been previously extended and will expire on February 24, 2024. This report covers fiscal year 2022 and includes the period from July 1, 2021, through June 30, 2022. This annual report includes:

- Project status reports detailing the progress of design, review, approval, and construction activity achieved to date
- Findings related to plan review program activities
- Explanations and justifications for any design elements not meeting Environmental Site Design (ESD) to the Maximum Extent Practicable (MEP) according to the Design Manual or the 2011 Standards
- Changes or modifications to the Guidelines and Administrative Procedures
- Significant staffing changes
- Summaries of site inspections conducted
- Comments received and written responses provided to local agencies
- Findings related to quality assurance and quality control activities
- Investigations of citizen complaints and inquiries

1.3 PROJECT STATUS

The Plan Review Division (PRD) maintains a database to track submittals and approval progress on all projects. The table provided below provides a summary of the PRD review and approval activity that occurred in FY 2022. Overall, the review and approval activity remained consistent from FY 2021 to FY 2022.

Project status reports included in Section 2.1 show the progress of design, review, approval, and construction activity achieved during the reporting period. The reports are separated by project type (DBB, DB, MDE). Summaries of Plan Review Division review and approval activity and SWM best management practice (BMP) as-built approvals are included below:

FY 2022 Review and Approval Activity

	Design-Bid-Build Projects (DBB)		Design-Build Projects (DB)		MDE Projects (MDE)		Total
FY 2022 Submitted Projects	303	95%	4	1%	12	4%	319
Submissions Received	561	88%	55	9%	20	3%	636
Comment Letters Issued	243	85%	34	12%	10	3%	287
Concept Approvals	56	93%	4	7%	0	0%	60
Site Development Approvals	43	96%	2	4%	0	0%	45
Final Approvals	57	98%	1	2%	0	0%	58
Modification Approvals	73	87%	9	11%	2	2%	84
Final Approval Extensions	64	100%	0	0%	0	0%	64
378 Approval	0	0%	0	0%	1	100%	1
Dam Safety Approval	0	0%	0	0%	1	100%	1
As-built Structural Acceptance	25	82%	5	0%	6	18%	36*

*The total number of BMPs that received As-Built Structural Acceptance is 143 from the 36 Structurally Accepted projects.

Representative Projects

As requested by MDE, no representative project submissions or correspondence have been provided with the FY 2022 report. Information and documents pertaining to specific projects can be provided for review if requested by MDE.

1.4 QA/QC Activities and Summaries of Site Inspections

The MDOT SHA ensures quality assurance and quality control (QA/QC) of approved erosion and sediment control plans through inspections of MDOT SHA construction projects for compliance with the approved Erosion and Sediment Control Plans, utilizing a checklist and rating system. The MDOT SHA's quality assurance inspections are performed by Regional Environmental Coordinators (RECs). The MDOT SHA utilizes a real-time inspection and reporting system called the QA Toolkit. The Quality Assurance Division remains with 14 total representatives in FY 2022 due to workload reduction and utilizes a Progressive Schedule Protocol (PSP) in effort to ensure maximum resource coverage with a priority review to critical/sensitive environmental projects.

PSP is an inspection schedule which allows for more efficient use of resources and management of environmental risk while maintaining compliance. This is accomplished by prioritizing certain projects for increased inspections and reducing routine visits to projects with good performance.

The PSP schedule includes:

- *Inspecting projects routinely a minimum of every 4 weeks to ensure compliance to the approved ESC/SWM plans through the OOC61/QA-1 and contract documents.*
- *Increasing the inspection frequency to a minimum of 4 times per quarter (approximately every 3 weeks) on projects with incentives.*
- *Increasing the inspection frequency to a minimum of every 2 weeks for projects which receive a C, D or F rating.*
- *Reducing the frequency of future QA inspections to original schedule when a project demonstrates A ratings for 3 consecutive QA inspections.*

This schedule automatically prioritizes major construction projects and reduces routine visits on those performing at or above expectations, while increasing inspections to a 2-week schedule on those projects whose ratings drop below a “B” rating. To help reach the overall goal of 100% compliance by MDOT SHA, QAD utilizes the inspection schedule to focus resources on projects with more risk to potentially impact Maryland’s water resources. Projects rated at the top of the inspection rating scale will not be inspected as often. However, ensuring that contractors retain the right to continue to earn incentives is critical in establishing the inspection timeline. Therefore, the QA inspection schedule does not impact projects with any specifications identifying a 2-week inspection requirement.

For projects where QAD reviews are conducted every four weeks, QAD ensures the record of reviews and reporting is done by the construction contractor both daily and following rain events (per the contract documents). QAD also ensures the MDOT SHA construction inspection staff reviews E&SC and SWM compliance once a week and following every rain event which produces runoff (per a construction directive). The compliance check of the project record is entered as part of the QA reports (QA-1 and QA-2). Negative results could potentially lead to non-compliance.

PSP has allowed MDOT SHA to maximize its REC resource review of projects, with critical projects (those with environmental sensitivity and increased oversight needs) being prioritized. PSP accounts for all projects and adjusts the scheduled inspection routine to maximize potential compliance return. PSP helps identify programming adjustments and resource needed to strengthen the E&SC and SWM compliance oversight. PSP has also helped QAD develop a new workload flow, again ensuring the right resources are available to cover delegated authority’s requirements and needs. PSP has allowed QAD to identify projects where increased oversight is needed, as well as where any help/direction is needed. It also helps identify where well performing projects exist and what could be learned from them. Automatic scheduling for the REC’s is done via the QA toolkit based on the PSP.

During this FY 2022 period, MDOT SHA performed 4016 inspections (2666 QA-1 and 1350 QA-2 reports) on 291 projects. Sixteen non-compliances were issued to fifteen (15) unique projects. All these non-compliance events were subsequently corrected. Grades were not issued on 5 of the 16 non-compliances due to mitigating circumstances. Of the 15 unique projects, non-compliance was issued once for one (1) project. Shutdowns cause significant financial impacts to the contractor as all deployed material, equipment, and construction laborers become inactive until the deficiencies are addressed. This is one of the largest sanctions available to QAD and promotes contractor attention that greatly reduces chances of repeat non-compliance.

Revocation of a contractor's Erosion Sediment Control Manager (ESCM, or Yellow Card) and Contractor Superintendent certifications is a separate sanction that can impact the contractor, because these certifications are required for those personnel to be employed on an MDOT SHA project. Revocation is activated for a period of six months upon two ratings of "F". Certification revocations are listed in each project inspection report. There were 5 Yellow Card revocations during this reporting period. Details of the non-compliance findings and the actions taken can be found in the provided summary of Quality Assurance Inspections by MDOT SHA district. The QA Program also received and addressed 4 related erosion and sediment control or stormwater management environmental complaints and inquires in FY 2022 from MDE, local jurisdictions, or citizens.

1.5 DESIGN ELEMENTS NOT MEETING ESD TO THE MEP

The Maryland Legislature enacted the Stormwater Management Act of 2007 which established stringent requirements to implement Environmental Site Design (ESD) to the Maximum Extent Practicable (MEP). MDOT SHA's Plan Review Division reviews each project submission in relation to the requirements, Guidelines, and Procedures. Stormwater Management reports are required for each project. Most projects include plans. At concept stage, SWM requirements are reviewed for management required and conceptual management provided as well as the appropriateness of any waivers and variances requested. Site development and final stage submissions are reviewed for engineering design, consistency, and completeness. Waivers and variances are granted only at final approval once all applicable documentation and local agency approvals are provided.

MDOT SHA-PRD has utilized the language in COMAR Section 26.17.02.06.A(2) as a basis to determine whether a project meets ESD to the MEP:

“The MEP standard is met when channel stability and 100 percent of the average annual predevelopment groundwater recharge are maintained, nonpoint source pollution is minimized, and structural stormwater management practices are used only if determined to be absolutely necessary.”

This statement is further explained in the MDOT SHA Guidelines Section 4.1 and 4.2 as minimum control requirements for new development and redevelopment.

Most waivers and variances granted by PRD are for maintenance or redevelopment projects (funds 30, 33, 74, 76, 77, 80, 88). Many of these projects are in developed corridors with limited opportunities for ESD facilities. They often include small amounts of additional impervious scattered throughout the project (funds 76, 77, 80) or narrow strips of additional impervious along the corridor (funds 33, 79). These project types use the Water Quality Bank to meet WQv requirements when ESD facilities are not practicable.

PRD granted variances for 6 projects within FY 2022. All variances were for redevelopment projects. The tables below show waivers and variances accepted in FY 2022 by fund type and breakdown of waivers by type.

FY 2022 Granted Waivers and Variances by MDOT SHA Fund Type

Fund	Description	No. of Waivers	No. of Projects with Waivers	No. of Variances	No. of Projects with Variances
14	Maintenance	7	4	0	0
30	Crash Prevention	1	1	0	0
33	ADA Retrofit	7	1	1	1
70	Primary Roads	3	3	0	0
72	Interstate	7	1	0	0
74	Drainage	1	1	0	0
75	Emergency	1	1	0	0
76	Safety and Spot Improvement	2	2	4	2
77	Resurfacing	42	7	2	1
79	Sidewalks	0	0	3	1
80	Bridge	11	9	0	0
87	Intersection Capacity Improvement	1	1	2	1
88	Bicycle Retrofit	7	1	0	0
Totals		90	32	12	6

FY 2022 Granted Waivers by MDOT SHA Fund Type and Waiver Type

Fund	Description	33A	33B1a	33B1b	33B2a	33B2b	33B1ci	33B1cii	33B2ci	33B2cii	33B3
14	Maintenance	7	0	0	0	0	0	0	0	0	0
30	Crash Prevention	0	0	0	0	0	0	0	0	0	1
33	ADA Retrofit	7	0	0	0	0	0	0	0	0	0
70	Primary Roads	3	0	0	0	0	0	0	0	0	0
72	Interstate	7	0	0	0	0	0	0	0	0	0
74	Drainage	1	0	0	0	0	0	0	0	0	0
75	Emergency	1	0	0	0	0	0	0	0	0	0
76	Safety and Spot Improvement	1	0	0	0	0	0	0	0	0	1
77	Resurfacing	42	0	0	0	0	0	0	0	0	0
80	Bridge	10	1	0	0	0	0	0	0	0	0
87	Int. Capacity Improvement	0	0	0	0	0	0	0	0	0	1
88	Bicycle Retrofit	4	3	0	0	0	0	0	0	0	0
Totals		83	4	0	0	0	0	0	0	0	3

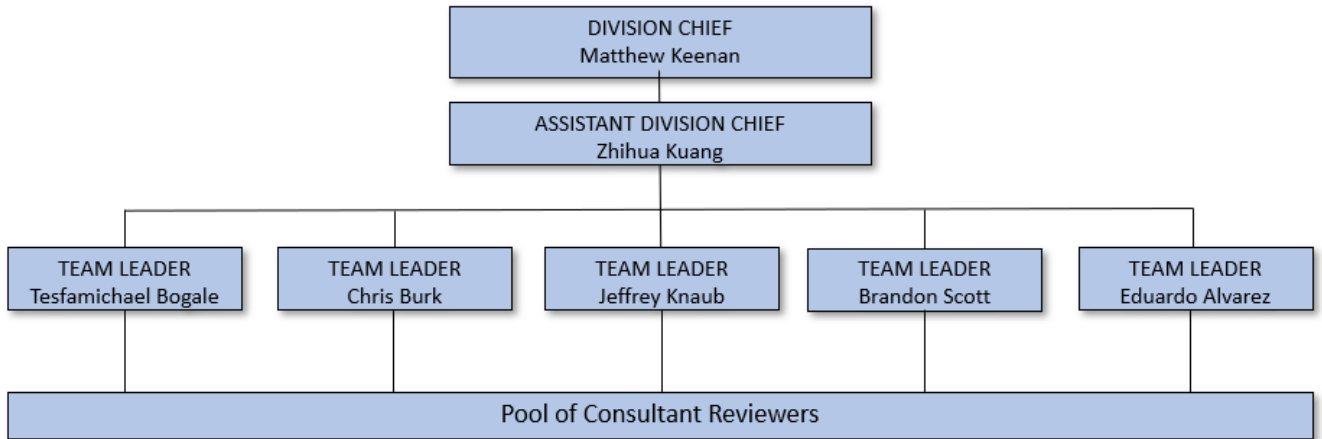

The MDOT SHA Office of Highway Development (OHD) process is designed to ensure ESD to the MEP. It begins with a project concept design presentation to the OHD Director (Director's Review). Any concerns or issues noted during the Director's Review are addressed before the initial concept submission is made to PRD. This process provides leadership-level commitment to project needs and a focus on ESD to the MEP at a very early stage in the design process.

1.6 SIGNIFICANT STAFFING CHANGES

The Plan Review Division had several significant staffing changes during this reporting period.

PRD Team Member Taslima Akter, Ph.D., PE, left MDOT SHA PRD on January 11, 2022, and accepted a Team Leader position at the MDOT SHA Highway Hydraulic Division (HHD). PRD reclassified the Team Member position vacated by Taslima to a Team Leader position and is working to hire one additional team leader. Assistant Division Chief Zhihua Kuang, PE, was Acting PRD Division Chief from 11/1/2021 to 12/31/2021 while Matt Keenan, PE, Division Chief, was on paternity leave. Karuna Pujara, PE, the Deputy Director overseeing PRD retired at the end of 2021. With Karuna's retirement, Laura Ridler, PE, Deputy Director switched her role of Deputy Director of Operations overseeing the design divisions to the Deputy Director of Programs overseeing non-design divisions including PRD and notified MDE of the change by email on 1/14/22.

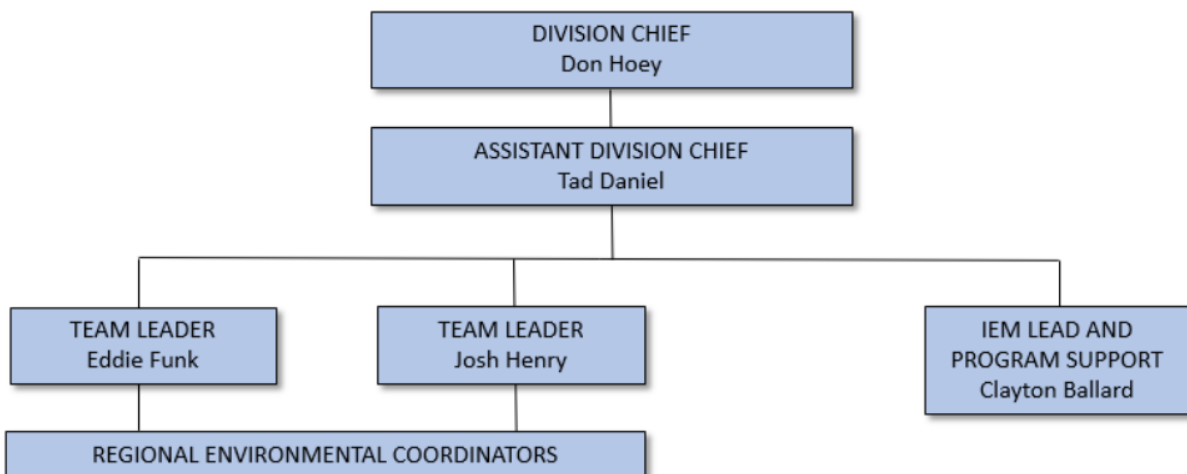

The updated organizational chart for the Plan Review Division is included below.

As reported in the FY 2019 Annual Report, the Quality Assurance Program (QAP) was reorganized into the Quality Assurance Division (QAD) under the Office of Environmental Design (OED). The Quality Assurance Division had no significant staffing changes during this reporting period. The number of Regional Environmental Coordinators remains at 9.

In addition to the 9 RECs, QAD oversees the Independent Environmental Monitors (IEM) where required on construction projects, which currently numbers 4. The IEM oversight by QAD is an effort to enhance the E&SC and SWM compliance checks of projects. This updated structure of QAD will be incorporated into the Guidelines and Procedures documents.

The organizational chart for the Quality Assurance Division is included below.

1.7 LOCAL AGENCY COMMENTS AND RESPONSES

No local agencies reached out to PRD during the reporting period between July 1, 2021, through June 30, 2022. There are no current examples of formal correspondence related to local agency comments because most coordination with local agencies occurs informally through email or phone conversations. In relation to specific projects being reviewed by PRD and its coordination with local agencies, MDOT SHA remains committed to being responsive to requests received. During this reporting period, agency meetings were held for the following projects:

- I-695 Interchange at I-70, Baltimore County, Project No. BA0065272 (PRD No. 20-PR-0038)
- US 219 Meyersdale Bypass to Old Salisbury Road PEL Study, Project No. TBD (PRD No. TBD)
- MD 90 PEL Study, Project No. WO782B11 (PRD No. TBD)
- I-495 Southside Express Lanes Study (VDOT), Project No. TBD (PRD No. N/A)
- US 219 Meyersdale Bypass to Old Salisbury Road NEPA Study, Project No. TBD (PRD No. TBD)
- MD 90 PEL Study, Project No. WO782B11 (PRD No. TBD)

A meeting summary is included in Section 2.3.

1.8 INVESTIGATIONS OF CITIZEN COMPLAINTS AND INQUIRIES

MDOT SHA strives to provide outstanding customer service. The Highway Hydraulics Division utilizes a tracking tool to assist in this effort. Additionally, MDOT SHA uses an on-line customer care reporting and communication system. Both systems receive a wide variety of concerns associated with highway operations. MDOT SHA will continue to provide specific and focused information of citizen complaints and inquiries related to sediment and stormwater topics for projects being reviewed by PRD.

Background information and updates are included below for the projects previously reported on, along with new projects received by PRD during FY 2022. More detailed information for individual projects can be provided at MDE's request.

Investigations of Citizen Complaints Reported prior to FY 2022

PRD/MDE #	Contract Number	Customer Complaint Description	County	Dist.	Status/Remarks
10-SF-0402	FR5715170	Flooding concerns and impacts to the railroad property reported by Walkersville Southern Railroad	Frederick	7	Walkersville Southern Railroad flooding concerns are being addressed via a breakout project (FR0635174). The project has been advertised and a contractor was selected but construction has not started.
16-PR-0075 - 01	AW4655274	Drainage issue reported by downstream property owner.	Caroline	2	Under Design.
19-PR-0046 - 01	424D51421	Concern reported by a property owner over siltation in the roadside channel that diverted flow onto a farmland.	Charles	5	Construction completed.
19-PR-0046 - 04	23440-08551	Complaint reported by a delegate regarding silt-filled ditch and a deteriorated driveway culvert	Anne Arundel	5	Under construction.
19-PR-0075	TBD	Flooding concern reported by a property owner at 27185 Point Lookout Rd	Saint Mary's	5	Under Design.
17-PR-0128 - 02	XX1675574	Complaint by a property owner due to a ravine forming at the outfall of a MDOT SHA pipe adjacent to their property	Calvert	2	Project on hold due to budget constraints. Final Approval extension issued on 11/23/2021.
17-PR-0128 - 03	XX1675574	Complaint by a property owner due to unstable and erosive outfall.	Anne Arundel	5	Construction completed.
17-PR-0128 - 09	XX1675574	Slope failure was reported by Calvert County that endangered the parking lot of a fire and rescue station.	Calvert	2	Under Construction.
19-PR-0067 - 02	23878-08667	Complaint by a citizen about sediment on MD 742 at Blain Frantz Road.	Garrett	6	Under construction.
20-PR-0019 - 01	TBD	Complaint by a citizen regarding erosion at the outfalls of existing culverts.	Garrett	6	Under Design.

PRD/MDE #	Contract Number	Customer Complaint Description	County	Dist.	Status/Remarks
20-PR-0020 - 11	23878-08112	Customer complaint regarding water backing up onto property due to clogged ditch/pipes	Somerset	1	Construction completed.
20-PR-0020 - 15	23878-08113	Customer complaint regarding flooding on farm field	Wicomico	1	Final Approval issued on 7/10/20. Construction not started.
19-PR-0067 - 03	23878-08667	District reported a slope failure along I-97 requiring investigation.	Anne Arundel	5	Construction is completed.
21-PR-0003 - 03	23878- 08554	Customers complain about ditches and pipes frequently filled with debris blocking the natural flow path and causing flooding	Saint Mary's	5	Final Approval issued on 07/08/2021.
20-PR-0037	23878- 08555	MD 4 at 7780 Southern Blvd Emergency, access to property was compromised due to a pipe and slope failure sparking the need for emergency work	Calvert	5	Final Approval issued on 01/12/2021. Construction is completed.
21-PR-0013	CH3865175	Property owner complaint about flooding on property because of a failed CMP pipe under US 301	Charles	5	Emergency Construction completed. Final Approval issued on 06/09/2021.
20-PR-0045	SM2375175	Property owner complaint about flooding because of a blocked and failed pipe outfall and slope failure at MD 5 and MD 236	Saint Mary's	5	Emergency Construction completed. Final Approval issued on 01/06/2022.

The following are new projects initiated in the current reporting period following citizen complaints and emergency declarations due to floods, slope failures, culvert failures, outfall remediation, routine maintenance requirements, etc.

Investigations of Citizen Complaints Initiated in FY 2022

PRD/MDE #	Contract Number	Customer Complaint Description	County	Dist.	Status/Remarks
19-PR-0060	AX097A75	Commuters using MD 450 have been disrupted by frequent flooding along MD 450 near Bell Branch.	Anne Arundel	5	Emergency Construction completed. Final Approval issued on 01/21/2022.
20-PR-0037	86000	Outfall failure investigated in May 2020 following reports from a concerned property owner. This caused safety concerns for property owners accessing their properties.	Calvert	5	Final Approval issued on 1/12/2021. Construction is completed.
21-PR-0003 - 01	23878-08554	A dip in the fast lane of MD 235 due to a failed pipe and pipe connection with a median inlet resulted in several complaints.	Saint Mary's	5	Final Approval issued on 04/02/2021. Construction is completed.
21-PR-0003 - 02	23878-08555	A failed pipe resulted in a slope failure with customers expressing concern.	Calvert	5	Final Approval issued on 03/12/2021.
21-PR-0003 - 03	23878-08554	Flooding from heavy storm event requires frequent ditch and pipe cleaning in this area and results in customer complaints.	Saint Mary's	5	Final Approval issued on 07/08/2021. The cleanout activity has been completed.
21-PR-0003 - 04	23878-08552	Flooding from heavy storm event requires frequent ditch and pipe cleaning in this area and results in customer complaints.	Montgomery	3	Final Approval issued on 07/08/2021. The cleanout activity has been completed.
21-PR-0003 - 05	23878-08553	This project involves routine ditch trimming to maintain positive drainage along properties adjacent to MDOT SHA roads.	Charles	5	Final Approval issued on 12/30/2021.
21-PR-0003 - 06	23878-08552	Slope stabilization and drainage repair due to failed CMP pipe.	Washington	6	Final Approval issued on 03/10/2022. construction is completed.
21-PR-0003 - 07	23878-08552	Failed 24" RCP outfall remediation.	Calvert	5	Final Approval issued on 04/14/2022.

PRD/MDE #	Contract Number	Customer Complaint Description	County	Dist.	Status/Remarks
21-PR-0008 - 03	23878-08223	Driveway Pipe Replacement and Ditching.	Caroline	2	Final Approval issued on 1/24/22. Construction is completed.
21-PR-0013	TBD	Pipe failure of 36" CMP pipe.	Charles	5	Emergency Concept Approval issued on 5/21/2021. Construction is completed.
22-PR-0003	23878-08552	24" CMP pipe failure causing concern from downstream property owner and traveling public due to sinkhole in roadway.	Calvert	5	Emergency Concept Approval issued on 2/18/2022. Under construction.
22-PR-0012	PGA215175	Outfall failure that caused ramp closure and emergency declaration.	Prince Georges	3	Final approval issued on 1/24/22. Construction is completed.

1.9 PLAN REVIEW PROGRAM ACTIVITY FINDINGS

MDOT SHA initiated several programmatic initiatives during the past fiscal year that affect PRD, including:

- The global Covid-19 pandemic continued in FY 2022. MDOT SHA staff returned to the office and started a hybrid of in-office and remote telework environment starting July 6, 2021.
- PRD continued with an electronic only plan submission and review process in FY 2022. PRD utilizes Microsoft Teams to facilitate communication between PRD staff during the review process. PRD's existing reliance on electronic collaboration tools such as BlueBeam and ProjectWise eased the transfer to remote, electronic-only plan review and approval.
- New 2022 Standard Specifications for Construction and Materials is available as an online document.

In addition to the above Administration-wide efforts, PRD also undertook specific initiatives, including:

- PRD is aware that MDE is in the process of issuing a new General Permit for Discharges of Stormwater Associated with Construction Activity (commonly referred to as the

National Pollutant Discharge Elimination Systems (NPDES) Permit or NOI). In the interim period between the issuance of this new General Permit and expiration of the previous General Permit, a Declaration of Intent (DOI) for coverage under the expired NPDES General Permit (14-GP) for Construction Activities must be submitted to MDE for all projects that exceed 1 acre of earth disturbance or that impact Tier II Watersheds. MDOT SHA PRD will review the SWM and E&SC for projects in Tier II Watersheds in accordance with the requirements of the DOI process and the anticipated requirements of the new General Permit. MDOT SHA PRD is in communication with MDE regarding ongoing updates and will distribute information on new requirements to the Administration as it becomes available.

- PRD has been coordinating extensively with the MDE Sediment, Stormwater, and Dam Safety Program (SSDS) to allow PRD to become a designated Code 378 Small Pond review and approval authority. PRD drafted a standalone Small Pond Guidelines and Procedures in FY 2021. The draft documents have been reviewed and commented by MDE. SHA PRD and MDE are still working together to finalize the Small Pond Guidelines and Procedures. PRD is currently addressing the comments that were received from MDE on May 16th, 2022. On July 1st, 2022, MDE signed a Memorandum of Understanding with MDOT SHA that will allow SHA PRD to review and approve Small Ponds for SHA projects on behalf of MDE. SHA PRD will be working with MDE SSDS to establish a pilot Small Pond review program to start the transition.
- The General Approval that will cover routine maintenance activities, as mentioned in the FY 2020 and FY 2021 Annual Report, is still under development and has not been submitted to MDE for concurrence. During FY 2022, PRD continues to implement the process reported in FY 2021 Annual Report that the MDOT SHA Office of Environmental Design (OED) Environmental Permitting Division (EPD) facilitates review of maintenance activities and determines if these activities (ditch trimming, hand cleaning ditches, repairing minor drainage structures and repairing pipes and/or box culverts) are exempt from PRD's SWM and ESC review based on the criteria of less than 5000 sf and 100 cy of disturbance. EPD continues to provide monthly report to PRD on the exempt maintenance activities that have been performed. This procedure still requires individual non-exempt maintenance activities to go through the full PRD SWM and ESC review and approval process. In addition, PRD review is required when OED EPD screens a maintenance activity which may impact a stormwater management BMP except for grass swales which was added to the maintenance activity list reviewed by OED EPD in FY 2022. This process has been working very well to date and is expected to continue until the General Approval for maintenance activities are in place and concurred by MDE.

- PRD attended the Climate Change and Resiliency training hosted by the American Society of Highway Engineers (ASHE) on February 22, 2022. The training was conducted virtually.
- PRD, in coordination with ASHE, provided training titled “Path to PRD Approval”, with a focus on discussion of common issues that prevent stormwater management and sediment erosion control plan approval from SHA PRD and potential solutions. The training was conducted on February 15, 2022, virtually.
- PRD attended the Maryland Quality Initiative (MdQI) conference from May 25, 2022, to May 26, 2022. The training was conducted in person.
- In order to implement MDE Dam Safety’s Policy Memorandum #2 updated on February 15, 2022, in conjunction with a new Dam Safety Policy Memorandum #5 on Superwide roadway/railroad embankments published on February 16, 2022, PRD continued requiring designers to include detailed evaluations of culverts to determine if the impounded water requires classification as a pond or dam. PRD continuously monitors the MDE State and Federal Plan Review and MDE Dam Safety websites for new policies and will implement them as they are published.
- To facilitate implementation of approved E&SC and SWM plans with a minimum amount of modification during construction, PRD requested constructability review comments and responses during the Site Development stage of review starting from January 2, 2020, for SHA projects from the Office of Highway Development (OHD) and requested the constructability review documentation to other SHA offices prior to final approval for more complex projects. In addition to minimizing approval modifications, this review process facilitated improved implementation of approved E&SC plans.
- MDOT SHA has been in the process of developing the Public-Private Partnership (P3), known as the Op Lanes Maryland (Op Lanes MD) or Managed Lanes Study Phase 1, for improvements on I-495 from VA to I-270 and on I-270 from I-295 to I-370. This partnership involves a partnership with Phase Developer (Accelerate Maryland Partners, AMP) for predevelopment activity, who was selected from an earlier proposal process. The current schedule includes selecting Section Developer(s) in July 2022 to design, build, operate and maintain (DBOM) toll lanes along the corridor. The contract term will be 50 years. This P3 arrangement represents a change in the contracting processes for MDOT SHA, as well as adjustments to the review and enforcement procedures. The intent is to maintain current, standard MDOT SHA procedures to the extent practical, including the typical procedures and functions of MDOT SHA PRD and QAD. However, since the contracting mechanism varies from typical MDOT SHA contracts, some adjustments are necessary.
 - Since the Section Developers will effectively be an arm of MDOT SHA operating through the MDOT SHA Office of P3 and that since design, construction and

maintenance activities will all be completed under the MDOT SHA umbrella, it was concluded (after consultation with MDE) that permitting, inspections and enforcement of the Op Lanes MD program was appropriate to be completed under the jurisdiction of the MDOT SHA's delegated authority. As part of a P3 agreement, the developers, in conjunction with MDOT SHA, are required to prepare and update a Water Resources Review and Inspection Management Plan (RIMP). The RIMP is intended to be a living document during the 50-year contract term, outlining the processes and procedures that might otherwise be contained in MDOT SHA Standard Specification and/or Special Provisions and define the roles and procedures for interactions between the developers and MDOT SHA. The RIMP and the P3 agreement together will provide the structure under the Op Lanes MD program for SWM/ESC review and inspection.

- Since the construction contracts will be implemented by the developer, under the terms of the P3 agreement, MDOT SHA's SWM/ESC specifications will be enforced except for measurement and payment and liquidated damages. The nature of a P3 contract is for the developer to pay for the proposed work, not the owner (in this case, MDOT SHA). For standard MDOT SHA contracts, liquidated damages are computed based on contract costs. Since there is no cost to the State on this P3 agreement, establishing such liquidated damages is infeasible. As an alternative, the Op Lanes MD P3 agreement and Technical Provisions includes a compliance regime. This compliance regime consists of an assignment of penalty points for failure to comply with items including SWM/ESC and assessing financial penalties for violations. The final compliance regime will be provided once available.
- Another area of difference is the SWM/ESC submittal process. Since a developer is preparing plans for MDOT SHA, the Office of P3 will process the submittals to MDOT SHA PRD. It is the typical procedure for the MDOT SHA lead office to process the submittals; however, the scale and scope of the initial Op Lanes MD project and 50-year period is unusual, and typical MDOT SHA specifications for PRD review timeframes will not apply under contract provisions.
- Since the developers will be involved for a 50-year period, the developer may need to utilize water quality banking. MDOT SHA has established a project specific WQ account for the developer so that deposits/debits will be attributed to the project with the agreement that the Program will maintain a positive

overall balance. The developer is required to reconcile the bank account with PRD on a regular basis, anticipated to be yearly.

- FY 2022 has yielded no construction activity for the P3 program. One formal Conceptual SWM/ESC review was completed for the full Phase 1 South corridor in November 2021. The comments will be used as guidance to the Section Developers once individual Sections are awarded. It is anticipated that the next FY annual report will report more intensely on the activities being undertaken and noted above.

1.10 MODIFICATIONS TO THE GUIDELINES AND PROCEDURES

SHA PRD is currently following the Sediment and Stormwater Guidelines and Procedures Version 1.4 published on October 6th, 2017, for Part A (Sediment and Stormwater Guidelines) and Part B (Sediment and Stormwater Administrative Procedures), and Part C (Sediment and Stormwater Technical Procedures) published on June 7th, 2018. PRD drafted modifications to the Guideline and Administrative Procedures (Version 1.5 drafted on October 9, 2018) and submitted to MDE with the annual report of FY 2018. MDE requested that PRD continued to provide updates in the next annual report per the review comments of FY 2018. Later in preparation for SHA PRD to become a designated approval authority for Small Ponds from MDE, SHA PRD revised the Guidelines and Procedures based on the Version 1.5 to include Code 378 Small Ponds. The documents were submitted to MDE on July 14th, 2020. During the later working sessions with MDE in FY 2021 to obtain Small Pond designation approval authority, the MDE State and Federal Plan Review Division (MDE PRD) expressed that the changes related to stormwater management and erosion sediment control in draft Version 1.5 needed to be further discussed and MDE PRD and SHA PRD should collaborate to incorporate changes to the Guidelines concurrently. MDE further instructed SHA PRD to separate the sections pertaining to Small Pond from the Sediment and Stormwater Guidelines and Procedures and produce a standalone Guideline and Procedures for Small Ponds. SHA PRD and MDE are still working on to finalize the Small Pond Guidelines and Procedures. PRD is currently addressing the comments that were received from MDE on May 16th, 2022.

During the previous reporting periods, PRD coordinated with MDE Plan Review Division (MDE PRD) to make modifications to some carved out sections of the Sediment and Stormwater Procedures. PRD drafted the documents of Reviewer Qualifications, Conflicts of Interest and Alternative Project Delivery Procedure and submitted them to MDE. PRD also developed Minor and Major Field Modification Guidelines and Procedures that will remove HHD from the review

process and included the document with FY 2021 Annual Report. The Reviewer Qualifications and clarification of Conflicts of Interest has been reviewed by MDE and will be incorporated into the future updates of the Guidelines and Procedures. The Alternative Project Delivery Procedure is still at MDE for review. MDE provided review comments on the Field Modification as part of MDE's review and responses to FY 2021 Annual Report on September 26, 2022. These comments will be addressed, and the revised Field Modification will be submitted to MDE separately after the FY 2022 Annual Report.

PRD will continue to report updates to MDE in the FY 2023 Annual Report.

1.11 ELECTRONIC DATA

As referenced in the previous sections, electronic data is located on the data drive submitted with this report. The following electronic data is included:

- PRD project data table that includes records of all PRD projects
- Agency Meeting Materials
- Erosion and sediment control inspections, non-compliant inspections, and enforcement actions:
 - QA Non-compliance Findings (1B1 QA Non-Compliances for FY22.pdf)
 - Quality Assurance Inspections by District (1B2 QA Inspection and Grade Distribution FY 22.pdf)
 - E&S Statistics are included in the MS-4 geodatabase

2.1 PROJECT STATUS REPORTS

Three Project Status Reports are included starting on the following page:

1. MDOT SHA Design-Bid-Build Projects
2. MDOT SHA Design-Build Projects (post award)
3. MDE SF Projects

2.3 AGENCY AND PUBLIC MEETING SUMMARY

Agency Meeting Summary

The following are the Inter-Agency meetings that were held between July 1, 2021, through June 30, 2022.

August 25, 2021, IRM

I-695 Interchange at I-70, Baltimore County, Project No. BA0065272 (PRD No. 20-PR-0038)

The project team provided a brief history/background on the project. IRM coordination occurred twice in 2018 before public comment resulted in the commitment to maintain all existing connections in the interchange in 2019. Public Involvement was re-initiated in 2021. The discussion noted that the exact limits of this Design-Build project will be determined through traffic modeling and discussions with the I-695 TSMO team, but that it would not include Baltimore City facilities (Cooks Lane, Security Boulevard, or park-n-ride lot) nor US 40. The Design-Build project will be scoped for a design that will address the project intent, including providing peak hour congestion relief, maintaining interstate to interstate connectivity, removing the stacked bridges, and minimizing ROW takes; however, a preferred Alternative will not be given to the Design-Builder to maximize innovation during their design. Purpose and Need is still under development, with the intent of targeting a Categorical Exclusion as the environmental document.

September 22, 2021, ACM (Pennsylvania)

US 219 Meyersdale Bypass to Old Salisbury Road PEL Study, Project No. TBD (PRD No. TBD)

MDOT SHA supported PennDOT at their Agency Coordination Meeting (ACM) as a coordinating state on the US 219 PEL study, which spans both states. The project team provided an overview of the completed PEL study, with discussion on tribal coordination (primarily in PA), P&N memo updates, endangered species coordination and preliminary engineering. The intent of this project is to complete Corridor N of the Appalachian Development Highway System (ADHS) through improvements to the section of US 219 between the four-lane highway section south of Meyersdale, Pennsylvania, and the north end of the newly constructed I-68/US 219 Interchange in Garrett County, Maryland. The project will supplement the interstate system by connecting I-68 and the Pennsylvania Turnpike (I-76), connecting the

study area portion of Appalachia to the interstate system, and improving mobility for motorists and freight along US 219.

March 16, 2022, IRM

MD 90 PEL Study, Project No. WO782B11 (PRD No. TBD)

The Project team provided a summary of the goals of the PEL process for this 12-mile long, access-controlled corridor, which is to identify the long-term transportation needs and identify and prioritize individual breakout projects which could move forward as independent NEPA projects. An environmental study was also presented, which noted the diversity in land use, natural and cultural resources that exist in the project area. The public involvement strategy was discussed, and the current schedule anticipates the PEL report to be completed by December 2022. Areas of agency focus were priority funding areas, impacts to the existing bridges, and potential coordination on the Isle of Wight Bay, which is a DNR management area.

I-495 Southside Express Lanes Study (VDOT), Project No. TBD (PRD No. N/A)

The study, which is being led by VDOT, proposes to extend the Virginia Express Lanes System along the southern section of the I-495 Capital Beltway. The study limits extend approximately from the Springfield Interchange (I-95/I-395/I-495) in Fairfax County, Virginia, to approximately the MD 210 Interchange in Prince George's County, Maryland. VDOT will be coordinating closely with MDOT SHA on improvements in Maryland. VDOT is initiating a NEPA Environmental Assessment (EA) in coordination with FHWA. VDOT plans to evaluate three alternatives: addition of one Express Lane in each direction, addition of two Express Lanes in each direction, and a no-build alternative. NEPA completion is anticipated in early 2024.

May 18, 2022, IRM

I-495 Southside Express Lanes Study (VDOT), Project No. TBD (PRD No. N/A)

The study, which is being led by VDOT, proposes to extend the Virginia Express Lanes System along the southern section of the I-495 Capital Beltway. The purpose of the presentation was to inform the agencies of the upcoming public informational meeting, at which the Draft Purpose & Need would be provided to the public for their input and comment.

June 15, 2022, IRM

US 219 Meyersdale Bypass to Old Salisbury Road NEPA Study, Project No. TBD (PRD No. TBD)

MDOT SHA is a coordinating partner with PennDOT on this NEPA study, which spans both states. The project team provided an overview of the Draft Purpose & Need, which will be presented at an upcoming public informational meeting. From the previous PEL study, proposed alignments D modified, E and E Shift will be further studied during NEPA. Each alignment is divided into three sections: southern, middle, and northern. As NEPA begins, PennDOT and MDOT SHA will be looking to schedule a joint ACM/IRM meeting (PA and MD agencies) to facilitate open dialogue on the full corridor. The current schedule is to have NEPA completion in 2024.

MD 90 PEL Study, Project No. WO782B11 (PRD No. TBD)

The Project team provided an update the PEL study and share the information that will be presented during a June 21, 2022, public meeting. It was communicated that the following conceptual strategies to be evaluated during the PEL include:

- No Build
- Three-Lane Roadway – two EB lanes and 1 WB lane (Ex. Bridge may be Restriped or replaced)
- Four-Lane Roadway – two EB lanes and 2 WB lanes
- St Martin River and Assawoman Bay crossings – options of using the existing bridge, new bridges in the same location, or new bridge alignments
- Intersection/Interchange improvements along the corridor

Discussion topics included transit information (no transit exists in the corridor), ped/bike considerations (currently prohibited on MD 90) and potential NEPA schedule (still under development).

In-Person Public Meetings							
Project	Date	Location	Office Lead	Meeting Type	Notes	Contract	PRD No
MD 140 project in Reisterstown (a combined County DPW water main replacement and MDOT SHA safety / resurfacing from Pleasant Hill Rd. to Stocksdales Avenue)	08/03/21	Annual "National Night Out" community safety event (MDOT SHA invited)-- Chartley Shopping Center in Reisterstown, which is right by the northern limit of this project	D4	In-person community event	MDOT SHA had a dump truck, table with safety giveaways and a display board of the project map and project fact sheets.
